

# CIS 4: Introduction to Computers, Business Applications

3 units, transfer UC, CSU

Santa Monica College  
Summer Session 2017

Sections 1138 & 1139  
Online Course

## Class Syllabus

(updated June 5, 2017, subject to change)

### Instructor Information

<b>Instructor:</b>	Gina Jerry
<b>Phone:</b>	310-434-4686
<b>E-mail:</b>	jerry_gina@smc.edu
<b>Website:</b>	www.ginajerry.com
<b>Course Website:</b>	www.myitlab.com
<b>Office:</b>	B220-E
<b>Office Hours:</b>	Online by appointment

### Course Description

This course covers the broad use of microcomputers in business. Designed to familiarize students with the Microsoft Office Suite, it includes the study of word processing using Word, spreadsheet using Excel, database using Access, and presentation software using PowerPoint as well as Windows, Internet Explorer, and integration concepts. Hands-on experience in a microcomputer lab is included.

### Recommended Prerequisites

None, but it is recommended that students take CIS 1 prior to CIS 4. Ability to keyboard 25 WPM is also recommended.

### Supplies

Keep all of your class work in a separate folder on your computer or on a USB flash drive. A 1GB (or larger) USB flash drive will be more than sufficient for your work in this class.

## Hours Required

The content for a 16-week course has been compressed into a 6-week online format. Therefore, course assignments including textbook reading, homework, training, projects and quizzes will take approximately 15 to 20 hours per week. Your time commitment will vary based upon your own level of experience and learning rate

## Required Textbooks

The following textbook bundle is **MANDATORY** for the course. It includes a student access code that is **MANDATORY** for class, so every student **MUST** buy their own **NEW** bundle with access code. The bundle is **ONLY** available at the SMC Bookstore or A&R Bookstore (Pico & 17th, phone 310-314-4361) or you can purchase it directly from the publisher's website at <http://www.mypearsonstore.com/stores/CIS4>. Please email instructor for login information if you opt to purchase directly from the publisher's site.

Do **NOT** buy the book used or from any other source than the three listed above because you will still need the access code. If you buy the book used, you must still buy the access code separately for \$90. If you do not have the book and try to purchase an eText with code you will pay \$105. Please plan in advance to have the textbook bundle when this course starts.

**Textbook Bundle ISBN: 9781323632826**

This bundle contains the following:

1. *GO! with Microsoft Office 2016 Volume 1*
2. MyITLab access code
3. Custom Project Management book

## MyITLab Website

You will have access to [myitlab.com](http://myitlab.com) (Pearson's learning management system). This will allow you to complete training, watch videos, submit homework and take quizzes and exams online. Your textbook comes packaged with an activation code for MyITLab. The first time you login you will be required to setup your MyITLab account. Technical assistance is available 24 hours a day/7days a week at <http://www.myitlab.com>.

## Technical Requirements and Required Operating System Software

Students should have their own computer, an Internet connection and the required software.

Note that students taking on-campus classes are given priority in the CSIS department's computer lab (B231), but the lab is also available to online students. Currently the lab is open Monday – Saturday.

If you plan to complete your assignments **off-campus** you **must have**:

- a computer running the *Windows* operating system on a PC (Windows 7, 8 or 10) **No MACs, no exceptions**. The MAC Office software is NOT the same and cannot be used for this course.
- an Internet connection (Broadband (cable/DSL) or greater is recommended.)
- a Web browser Google Chrome or Firefox (DO NOT use Internet Explorer)

## Required Software

**Microsoft Office 2016 Professional:** (contains: Excel 2016, PowerPoint 2016, Access 2016, and Word 2016) American version ONLY - No other software is acceptable. MS Office 2007 or 2010 cannot be used to complete this course. **You will not be excused from any part of an assignment or exam because you are using the wrong version of Office or for example, the European or Chinese version of Office.**

Students using Office 2013 can complete the assignments, but the textbook is written specifically for Office 2016 so the minor differences between 2013 and 2016 will require students to make some adjustments when reading the book and completing assignments.

If you wish to purchase Office 2016 there are several companies that sell software at discounted prices for students. For example, you can purchase Microsoft Office Professional 2016 for \$39.99 at <http://www.shopcollegebuys.org>.

Note: the CSIS department has a special license agreement with Microsoft which allows students taking our courses to install Access 2016 on their personal computers at no cost. If you need Access 2016 because your Office package does not include it, please email me at [jerry\\_gina@smc.edu](mailto:jerry_gina@smc.edu) for more information. This is only for Access 2016. The other Office applications such as Word, Excel and PowerPoint are not free.

**WARNING:** If while installing new software you receive a warning message that you may have a virus and are provided with a phone number to call for support note that this is a scam. You should NEVER call such a number for assistance, allow them to take control of your computer, or pay money to have them fix the problem. To remove a virus, please contact Microsoft support directly at <https://www.microsoft.com/en-us/safety> for more information.

It is highly recommended that you have an antiviral software program running on your computer at all times. There are many companies that sell antiviral programs and there are also excellent antiviral programs available for free.

## Grading Policy

- Grades are not negotiable. They are based solely on points earned and not on percentages or "curves." There is no extra credit available for this class.
- A grade of "Incomplete" may only be granted at the very end of the term, when 90% or more of the course work has been satisfactorily completed, but a documented unforeseen event or illness prevents you from completing the class.
- **Dropping the class is YOUR responsibility.** Students are responsible for withdrawing from a class and must not expect faculty to initiate withdrawal procedures for them.

## Method of Evaluation

Letter grades will be determined using a standard percentage point scale as outlined below:

POINT RANGE	GRADE	PERCENTAGE
666-740	A	90%-100%
592-665	B	80%-89%
518-591	C	70%-79%
444-517	D	60%-69%
Below 444	F	59% and under

Total points will be determined by your performance in the following areas:

ITEM	POINTS PER ITEM	TOTAL POINTS	APPROX. PERCENT
Read & Do Assign (Chapter Work)	13 assignments @ 10 each	130	18%
Quizzes	12 quizzes @ 5 each 3 quizzes @ 10 each 1 quiz @ 20	110	15%
Homework	12 projects @ 10 each	120	16%
Capstone Projects	4 projects @ 15 each	60	8%
Skill-Based Training	6 trainings @ 10 each	60	8%
Skill-Based Exams	5 exams @ 25 each	125	17%
Integrated Project	1 project @25	25	3%
Final Exam	1 exam @ 75	75	10%
Class Discussions	7 discussions @ 5 each	35	5%
<b>TOTAL POINTS</b>		<b>740</b>	

## Students with Disabilities

Santa Monica College accommodates students with disabilities. If you qualify for any special accommodations due to a disability, you need to officially process your request through the Disabled Students Programs and Services (DSPS) office as close to the beginning of the semester as possible. If you believe you have a learning disability that has not yet been documented, please see me and contact the DSPS office. The DSPS office is located in the Admissions/Student Services Complex, Room 101, and the phone numbers are 310-434-4265 and 310-434-4273 (TDD).

## Course Requirements

- Students are responsible for following the schedule from the course website including any changes made by the instructor.
- A significant portion of your grade is based on homework assignments. Do not wait until the night an assignment is due to attempt it so that you have adequate time to review the material and remedy any possible technical difficulties or issues. If you, for example, email me at 5:00 pm on a Sunday with a question about the assignment that's due that evening, you will not receive an answer in time to complete the assignment. Not understanding the assignment is not considered a valid excuse for not turning it in on time. **Assignments must be submitted by 11:59 p.m. on the due date.**
- Students found cheating on any part of an assignment will receive no points for the total assignment. This includes sharing work or copying sections of another student's work. Regardless of the circumstances, both students involved will be considered at fault. So, do NOT offer your files to any student, even if they "only want to see what the finished assignment looks like".
- Weekly quizzes and exams should be taken during the week in which they are assigned. Once the deadline for a quiz or exam has passed it cannot be made up and the grade for that assignment becomes a zero. Quizzes and exams must be submitted by 11:59 p.m. on the due date.

## Course Expectations

Everyone comes to the class with different expectations. This online course DOES duplicate the content of the traditional course, but NOT the delivery. An online course relies on a self-directed student completing the assignments, readings, and threaded discussions on their own time schedule while meeting the posted deadlines. Students who perform at their potential, have high self-esteem, welcome change and are willing to assume responsibility, make decisions, and express opinions, are successful in this online course.

It is very easy to fall behind in an online class. There are no scheduled on-campus or on-line class periods. The entire course is asynchronous and can be accessed at your convenience. Your only requirement is to complete assignments and exams as scheduled on the course

schedule. You must be a self-directed student who can plan your schedule to accommodate the deadlines outlined in the syllabus. Cyber students are often in multiple life roles and time is a valuable commodity.

You are expected to visit the course website several times a week. Ideally, once a day. Once there, you will find announcements, lecture material, assignments, and exams.

**Important: You have registered for an online class. Online classes require substantive participation. This means that if you do not regularly and thoughtfully participate in the class activities defined in your course syllabus, you risk being dropped.**

## Student Learning Outcomes

- Students use office software applications to analyze different types of business information, thus improving their professional decisions.
- Utilizing various software applications to create documents, spreadsheets, databases, and slide presentations, students enhance their ability to present professional ideas.

## Certificate Information

CIS 4 is one of the required courses in the *Computer Business Applications* and *Word Processing* certificates. For more information on these certificates, please visit our department Web site at: <http://www.smc.edu/csis>.

## Course Objectives

Upon successful completion of this course students will be able to:

- Have a basic knowledge of Windows features; executing tasks, switching tasks, manipulating windows and icons.
- Learn how to be more productive by utilizing Windows file management strategies to organize files and folders.
- Use a variety of formatting techniques in Word to create professional looking business letters, reports and desktop publishing documents. Implementing features such as Quick Styles, headers and footers, cover pages, tabs, footnotes and endnotes, tables, and SmartArt graphics.
- Utilize additional Word features such as columns, WordArt, inserting and editing graphics and performing a mail merge.
- Create visually appealing and informative workbooks in Excel by applying built-in styles and themes as well as employing formatting techniques such as page breaks, headers and footers, backgrounds, and borders.
- Work with Excel functions and formulas to perform computations such as logical and financial calculations, while using features such as Auto Fill, and relative and absolute cell references.

- Create and format charts such as pie, column and line charts in Excel.
- Learn how data is organized in a database and the functions of a relational database management system.
- Implement guidelines for designing and creating databases and defining table relationships. As well as creating forms, queries and reports in Access.
- Learn how to plan and create a PowerPoint presentation that includes elements such as clip-art images, SmartArt diagrams, tables, shapes, and textboxes.
- Employ the use of templates, themes, slide layouts and master slides to format a presentation in PowerPoint. Create and print speaker notes and handouts.
- Develop skills to integrate several Office applications to complete tasks and projects. Features include embedding or linking Excel charts into a Word document, importing an Excel list into an Access database, and exporting an Access query to a Word document.
- Identify the basic concepts of project management.

## Academic Conduct Defined – Cheating Policy

Honest and ethical students are protected in this class. SMC has a clearly defined Honor Code, to which each student agrees during the enrollment process each semester. The College's Code of Academic Conduct applies to each and every course as well as each and every member of the academic community, faculty and students alike. It is your responsibility to familiarize yourself with The Code of Academic Conduct and Honor Code, which is printed in the General Catalog.

### Student responsibilities:

<http://www.smc.edu/StudentServices/StudentJudicialAffairs/Pages/What-you-should-know.aspx>

### Honor Council website:

<http://www.smc.edu/StudentServices/HonorCouncil/Pages/Honor-Code.aspx>

The Santa Monica College's Code of Academic Conduct and Reporting Policy defines academic dishonesty as the act of or assistance in deceiving, including fraud or deception, in any academic exercise. The instructor may assign a failing grade to the examination or assignment in which the alleged cheating or plagiarism occurred.

1. Using testing aids such as calculators, tape recorders, or notes on any examinations, unless otherwise specified by the instructor.
2. Allowing another individual to assume one's identity for the purpose of enhancing one's grade in any of the following: testing, field trips, or attendance.
3. Falsifying or attempting to falsify attendance records and/or grade rosters.
4. Representing the words, ideas or work of another as one's own in any academic exercise (plagiarism), including the use of commercial term paper companies.

5. Changing answers on a previously scored test, assignment, or experiment with the intent to defraud.
6. Copying or allowing another student to copy from one's paper (disk) or answer sheet during an examination. (This includes looking at someone else computer while taking an exam or doing the homework assignment.)
7. Giving and/or taking information during an examination by any means including sign language, hand signals, secret codes, or electronic transmission (like email).

In addition, it is considered cheating by:

- Giving a copy of your homework assignment to a classmate for the purpose of enhancing your classmate's grade. (Both students will be given zero and may be subject to disciplinary action)
- Taking exams and quizzes for someone else or with someone else.
- Sending emails to any other individuals asking for questions about the taking the exams, homework assignment, etc.

### Cheating Violations

Violations could result in failing grades, suspension from class, reports to the Campus Disciplinary, and subsequent academic disciplinary action. I enforce a ZERO-TOLERANCE policy on cheating in online and on ground classes. If I determine that you have relied too heavily on each other in preparing homework or any other project, you will be assigned a zero. If you copy another person's work or let another person copy your work, you are cheating. Regardless of the circumstances, both students involved will be considered at fault. All work you submit must be your own individual work. There is no excuse whatsoever for not doing your own work.

### Dates & Deadlines Summer 2017

<b>Sixteen Week Session (Full Semester)</b>	
SUMMER SESSION BEGINS	Monday June 19, 2017
Deadline to withdraw and receive REFUND	Thursday June 22, 2017
Deadline to withdraw and AVOID "W"	Sunday June 25, 2017
Deadline to apply for Pass/No Pass	Friday June 30, 2017
INDEPENDENCE DAY HOLIDAY OBSERVED - CAMPUS CLOSED	Tuesday July 4, 2017
Deadline to withdraw and receive GUARANTEED "W" (via Corsair Connect)	Wednesday July 19, 2017
END OF SUMMER (6 WEEK) SESSION	Friday July 28, 2017
